The screenshot shows the Spyder Python IDE interface. At the top, the file explorer shows the path `...es-Leila-Moharami\Python-exercise-Leila-Moharami\session03`. Below the file explorer is a toolbar with icons for file operations. The main area displays a message: "Code not profiled yet" with a subtext: "Profile your code to explore which functions and methods took the longest to run and were called the most, and find out where to optimize it." Below this message is a tabbed interface with buttons for "Help", "Variable Explorer", "Debugger", "Profiler" (which is selected), "Plots", and "Files". At the bottom, there is a console window titled "Console 2/A" showing the execution of a Python script. The console output shows three iterations of a program that prompts the user for their name. The first iteration prompts for "enter your name:" and the user enters "fatemeh". The second iteration prompts for "enter your name:" and the user enters "ali". The third iteration prompts for "enter your name:" and the user enters "azar". The console window also shows the prompt "In [87]: |". At the bottom of the console window, there is a message: "Activate Windows Go to Settings to activate Windows." The bottom status bar shows the following information: "Inline Conda: spyder-runtime (Python 3.12.11) LSP: Python Line 17, Col 35 UTF-8 CRLF RW Mem 68%". The system tray at the bottom right shows the time "11:05 PM 8/6/2026" and a notification icon with the number "2".

The screenshot shows the Spyder Python IDE interface. The top toolbar includes icons for file operations and a dropdown menu. The main editor area displays the file path `C:\Users\Farhangian\Desktop\project\my tamrin`. Below the editor, a message states "Code not profiled yet" with a brief explanation. A toolbar below this message contains tabs for "Help", "Variable Explorer", "Debugger", "Profiler", "Plots", and "Files". The bottom panel is a console window titled "Console 1/A" showing the execution of a Python script. The script is a menu-driven program that calculates the product of two numbers. It prompts the user for a choice and two numbers, then calculates the result and displays it. The console output shows the user entering '6' for the first number and '8' for the second number, resulting in 'hasel Zarb = 48'. The program then displays a menu with options: '+ | jam', '- | tafriq', '* | zarb', '/ | taqsim', and '= | exit'. The user enters '+', and the program prompts for two more numbers, '5' and '10', resulting in 'hasel Jam = 15'. The program then displays the same menu again. The user enters '=', and the program displays "tanks for your using my app ❤️". The bottom status bar shows "Python Console", "History", "Inline", "Conda: spyder-runtime (Python 3.12.11)", "LSP: Python", "Line 35, Col 42", "UTF-8", "CRLF", "RW", and "Mem 71%". The Windows taskbar at the bottom shows the time as 2:38 PM on 8/10/2026.

```
